1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 10-12 and 17 are rejected under 35 U.S.C. 102(b.) as being clearly anticipated by Minami et al.

Minami et al disclosed a method of forming an oscillator (title) comprising forming an oscillator having a delay (Figure 6 ring oscillator inverter stage delays) including forming the oscillator to generate a frequency (column 6, lines 3-9) and forming the oscillator to generate the delay (the delay depends on the current through transistors 102 and 105) so that changing the frequency (control input 4) generates an inversely proportional change in the delay (column 6, lines 10-20, As the input voltage is increased, current from converter 1 increases but at a rate that decreases, and current from converter 2 increases at a rate that increases. Say converter 1 supplies a delay control current while converter 2 supplies one that is inversely proportional, or vice versa.); ... within elements of a feedback path of the oscillator ... (Each ring oscillator delay stage has an output signal which is fed back as an input signal via the other delay stages, and so the delay is

generated within the respective feedback paths.); ... bias current of the elements of the feedback path ... (The delays are dependent on the bias current established by converters 1 and 2.); ... proportional ... (The bias currents proportionally complement each other.)

3. Claims 5-9, 13-16 and 18-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Mis whose telephone number is (571)272-1765. The examiner can normally be reached on Monday through Thursday.
